Company Requesting Cross Connect:

Primary Contact Name:

Primary Phone Number:

Primary Email Address:

Do you require any Professional Services assistance from Tier 3 to provision this circuit? If yes, please advise here:

Please provide the physical address Tier 3 will be connecting the cross connect to. Note: If this cross connect will be deployed within a data center Tier 3's currently resides, the addresses can be found at the following URL http://help.tier3.com/entries/23224937-Tier-3-s-Data-Center-Locations:

Who is the "Customer of Record" for the cabinet/cage this cross connect will terminate into?

If Tier 3 is paying for the cross connect, when can Tier 3 expect the LoA from the "Customer of Record"?

Please provide Z-side Details:
    a. Cage #
    b. Cabinet #
    c. Rack #
    d. Patch Panel #

Please select from the following media types/connectivity options for the cross connect

    a. Single Mode Fiber (SMF, 1310nm) 1Gbps (1000base-LX)

    b. 10gbps (10G-LR) fiber

    c. 1 Gbps copper/RJ45 (only if the cross connect is less than 100m in length – this selection will be rejected if more than 100m)

Will you require a backup cross connect? If so, please select one of the options a-c above. Note: Additional Professional Services and ongoing monthly fees will apply for each point-to-point circuit.

What is the preferred routing protocol (e.g., static, BGP, OSPF) our networks will communicate?

Please advise if any specific IP address ranges are required for Tier 3 announce:

Would you like to a point-to-point VPN deployed for backup connectivity? If yes, it is recommended BGP be used as the routing protocol for ease and automation of failover.

When is this circuit required to be provisioned?
